Work Tasks & Mulch

Work tasks sheets are now posted in the large shed. Most of the work is weeding and mulching. Mulch piles are now located on the South side near the trash bins and at the back gate near the orchard.

We have our parking lot back, thanks to Mark @CRPD.

Varmints

Rats, mice, and gophers seem to be our greatest challenge, and we are certainly open to any ideas from you.

It is each member's responsibility to set their own rat and mice traps. Also, it is imperative to clean out your plots so as not to provide a space for rat nests.

John Daane will continue to set the gopher traps and live traps for rabbits. Email Susan if you have gophers

Rodenticides are illegal to use in the state of California as of September 2020. Our owls and hawks thank you.

Greenhouse Is Almost Done!

We are very excited that we will have our new greenhouse to use for our seedlings! Thanks so much to everyone who contributed their time and expertise so this project could be completed by the end of January. It is just beautiful and will last for many years.

Covid-19 Update

Please continue respecting others by wearing a mask and practicing social distance. Also, please do not use cash for any transactions with the garden. We do accept checks, and PayPal is available through our website. You do not need a PayPal account to use it. We are so blessed to have our gardens to get some fresh air and have a place to be safe.

Never Underestimate the healing power of a quiet moment in the garden.

DONATION of vegetables is suspended until further notice. The container was removed, and you now have access to the Kiosk for current information as it comes along. Please visit the Kiosk often.

COMPOSTING is temporarily suspended. Please dispose of your garden waste into the dumpsters. If you would like an individual compost bin, please use this email: plotmanager@lasfloresgarden.com

Your Board wants to hear from you! We want to hear your ideas, questions, and comments.
